

# Why Choose Imagine Math?

The K–12 Math Personalized Learning Software Grant application will be open February 1 through March 27, 2020.

# 3+

More Proficient on SAGE\*

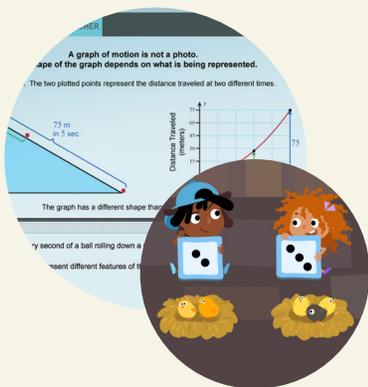

# 3x

A statewide study<sup>1</sup> found that students using Imagine Math 3+ to fidelity were 3x more likely to be proficient on SAGE assessments than non-Imagine Math students.

\*Student Assessment of Growth and Excellence

## Consistent, Positive Results on State Assessments

- A 2017–2018 study showed that students who used Imagine Math 3+ for more than 30 minutes per week were **66% more likely to achieve proficiency** on Utah's state assessment.
- A recent study showed that Imagine Math K–2 students scored 42% higher on the post test after using the program.

## Content for students grades K–Secondary Math II

Imagine Math provides adaptive, age-appropriate learning environments for students in Kindergarten through Secondary Math II.

- **K–2 Solution:** Engaging, effective math instruction designed to help early learners learn and love math. Available in English and Spanish.
- **Grades 3+ Solution:** Builds conceptual understanding and problem-solving skills with the support of a live, bilingual teacher, with first language support for English learners.

## FREE Imagine Math Facts

Imagine Learning will provide access to Imagine Math Facts for every school who selects the Imagine Math program for the 2020–21 STEM Grant, a \$5,000 value.

Imagine Math Facts works seamlessly with Imagine Math by strengthening students' math fact skills, so they are better prepared for more complex math.

## Access to Live Certified Teachers

Imagine Math offers **live, one-on-one, instruction from certified math teachers**. Students can receive support in **English or Spanish** before, during, or after school.

## New Additions to Imagine Math

To continually improve the math experience for students and teachers, Imagine Learning is adding the following features to Imagine Math:

- New second grade content and updated content for grades K–1.
- New, live activity report showing student status while using the program. Educators will have insight on students' behavior and can intervene when needed.
- Improved benchmark assessment experience and reporting.
- Improved accessibility for special needs students. Imagine Math content will be more accessible to a wider range of students with disabilities, including accommodations for blindness and low vision, deafness and hearing loss, speech disabilities, and more.
