

Service and support plan

Welcome to Mathspace. We're looking forward to working with you to implement your digital mathematics program.

Our team is here to help you get the most out of Mathspace - from your dedicated local support team, to our in-house team of teachers, content writers and technical experts - we're all here to ensure your Mathspace experience is smooth sailing.

Here are the basics to help you get started

1 Check out our online course

Our teacher course for new Mathspace teachers is a great way to get started: bit.ly/teachercourse

2 Use our teacher resources

We have sample lesson plans here: help.mathspace.co/instructionaltools

You can also find plenty of other teacher resources by searching help.mathspace.co

3 Book a PD session

This is a bespoke professional development session with one of our Mathspace trainers. You can book this here: calendly.com/mathspace/pd1

4 Set Your Goals

Whether you're doing a short pilot or using Mathspace for the full year, it's always good to have goals for what you want to achieve. For a goal setting template go to: bit.ly/goalsettingtemplate

5 Book a check-in with your Mathspace Account Manager

Once you start using Mathspace you'll have many more questions. You can always book a quick chat with your Account Manager here: calendly.com/mathspace/quickchat
